

iPRO Elite Silicone Eye Protector

The eye protector with patented* silicone-based adhesive

*patent pending

iPRO offers an easy, quick-to-attach and cost-effective opportunity to keep the eye closed during surgery and thus reduce the risk of corneal abrasion and infections.

- Non-adhesive tab aids placement, positioning, and removal
- Gentle adhesive designed to reduce the risk of skin tears and abrasions
- No pulling and ripping¹
- Transparent design for continuous monitoring of eye and orbital area during surgery
- Closed package and single-use sheets in pairs reduce the risk of contamination
- Eyelash friendly

iPRO Eye Protector

Item no.	PU
FHCEP3	100
